CUU: Compra de un producto

Objetivo: Comprar un producto.

Actor principal: Usuario.

Camino principal

- 1. El cliente ingresa a la página y se loguea con su cuenta en el sistema. El sistema valida que el cliente tiene una cuenta.
- 2. El cliente se decide por un producto y procede con la compra seleccionandolo. El sistema lo redirecciona para completar el pedido.
- 3. El cliente elige la cantidad que desea. El sistema valida que el cliente haya cargado previamente una dirección y lo redirecciona para terminar la compra.
- 4. El sistema muestra cantidad, subtotal, dirección, precio del envío y el total. El cliente elige un método de pago (Rapipago o Pagofácil) y confirma la compra.
- 5. El sistema registra la compra y actualiza el historial de compras del cliente.

Camino alternativo

- 1.a. < Durante > El cliente no tiene cuenta.
 - 1.a.1. El cliente se crea una cuenta y el sistema lo registra.
- 2.a. <Anterior> El cliente no se decide por ningún producto.
 - 2.a.1. Fin de CU.
- 3.a < Durante > El cliente no posee dirección
 - 3.a.1. El sistema se lo informa al cliente y le recomienda agregar una dirección para poder realizar la compra.
 - 3.a.2. Vuelve al paso 2.
- 5.a. <Reemplaza> El cliente no confirma o cancela la compra.

5.a.1. Fin de CU.

CUR - Restock de un producto

Objetivo: Actualizar el stock de un producto.

Actor principal: Administrador.

Camino Básico

- 1. El usuario realiza la compra de un producto. < CUU01: Compra de un producto >.
- 2. El administrador emite una lista y visualiza los productos observando que ya no hay más stock de alguno. **<CUU02: Revisión de productos>**.
- 3. El administrador informa de la situación para poder renovar el stock y cuando lo renueven físicamente, lo actualiza en el sistema. **<CUU03: Actualización de stock>**.
